No feet to drag : report on the disabled

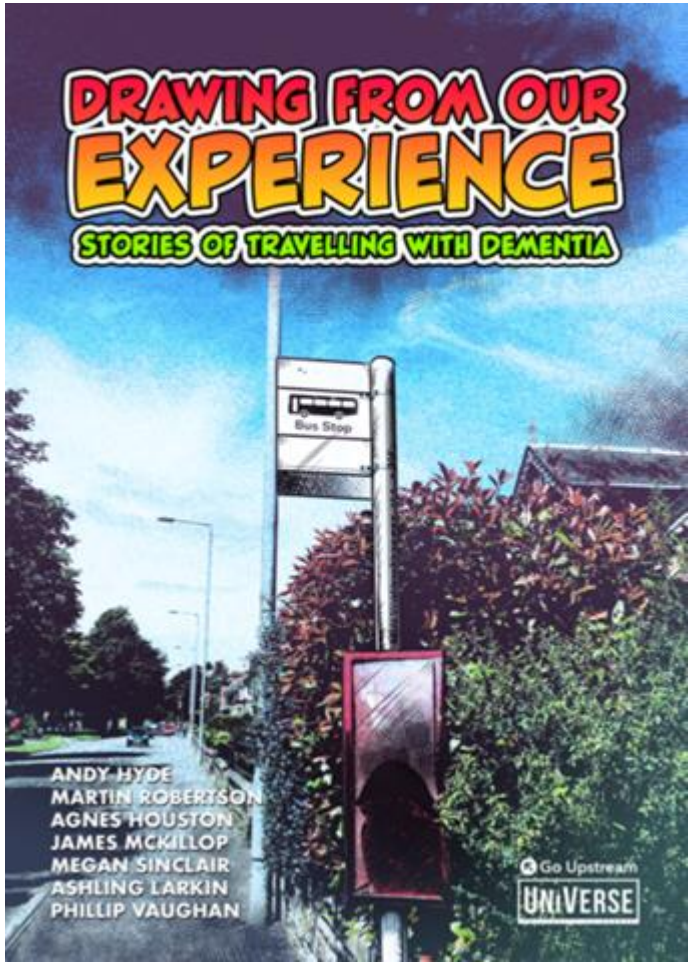

Disabled people '...continue to face barriers to accessing public transport, and efforts to improve the situation have been slow and piecemeal'. EHRC 2021

We have a problem!!!!!!

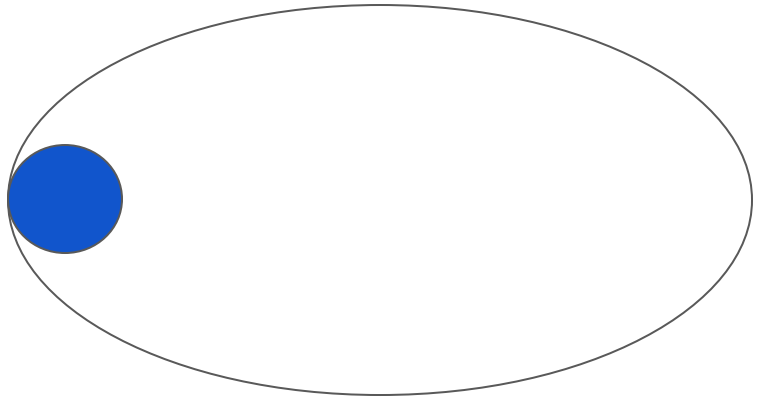

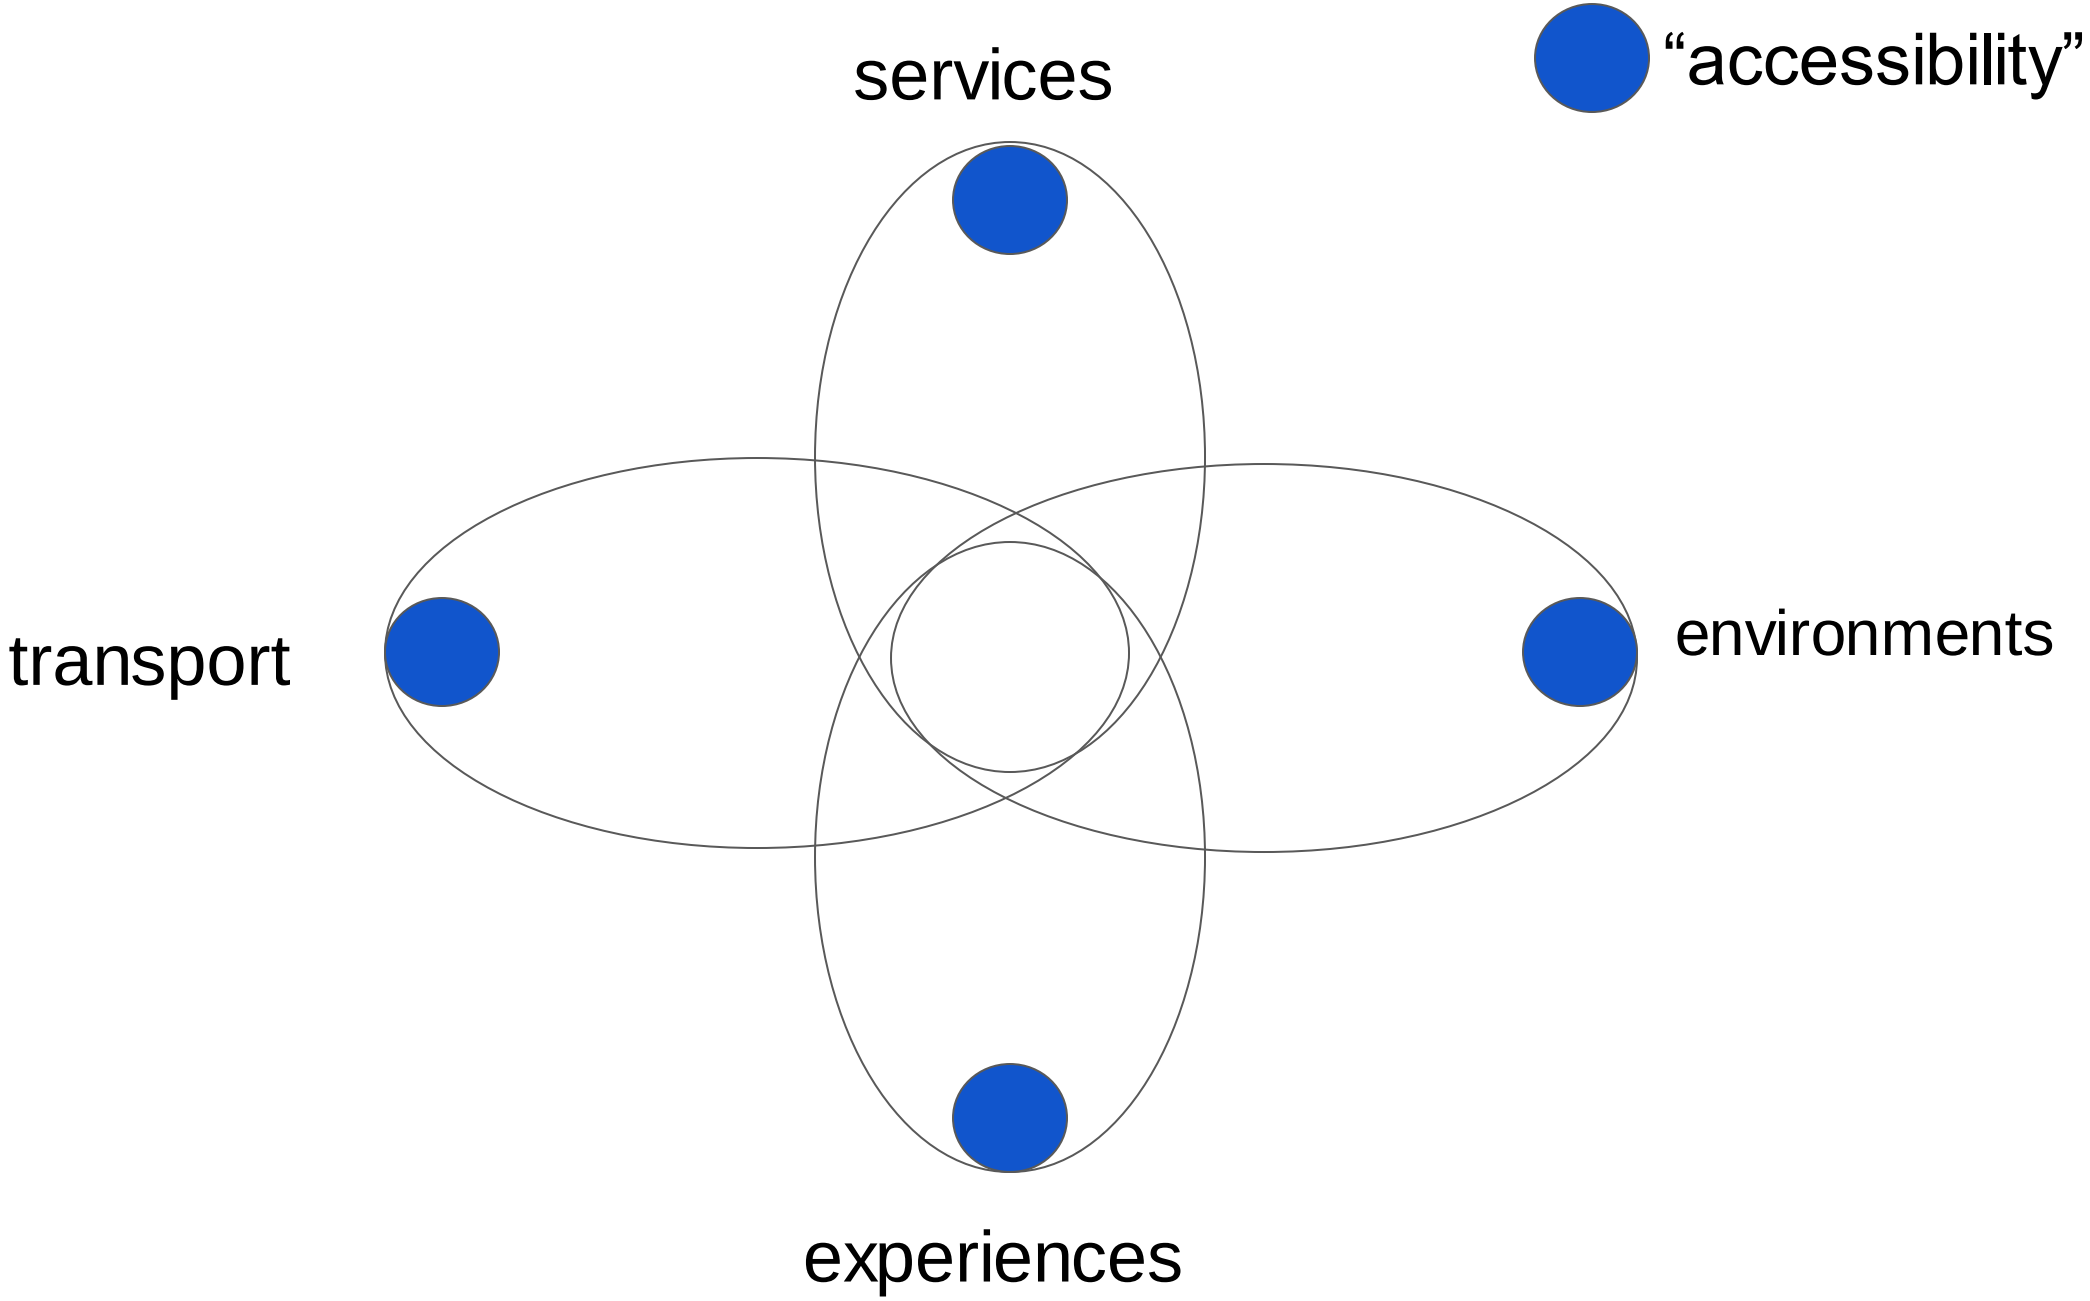

'eco-ableism' – a failure by non-disabled environmental activists to recognise two key issues:

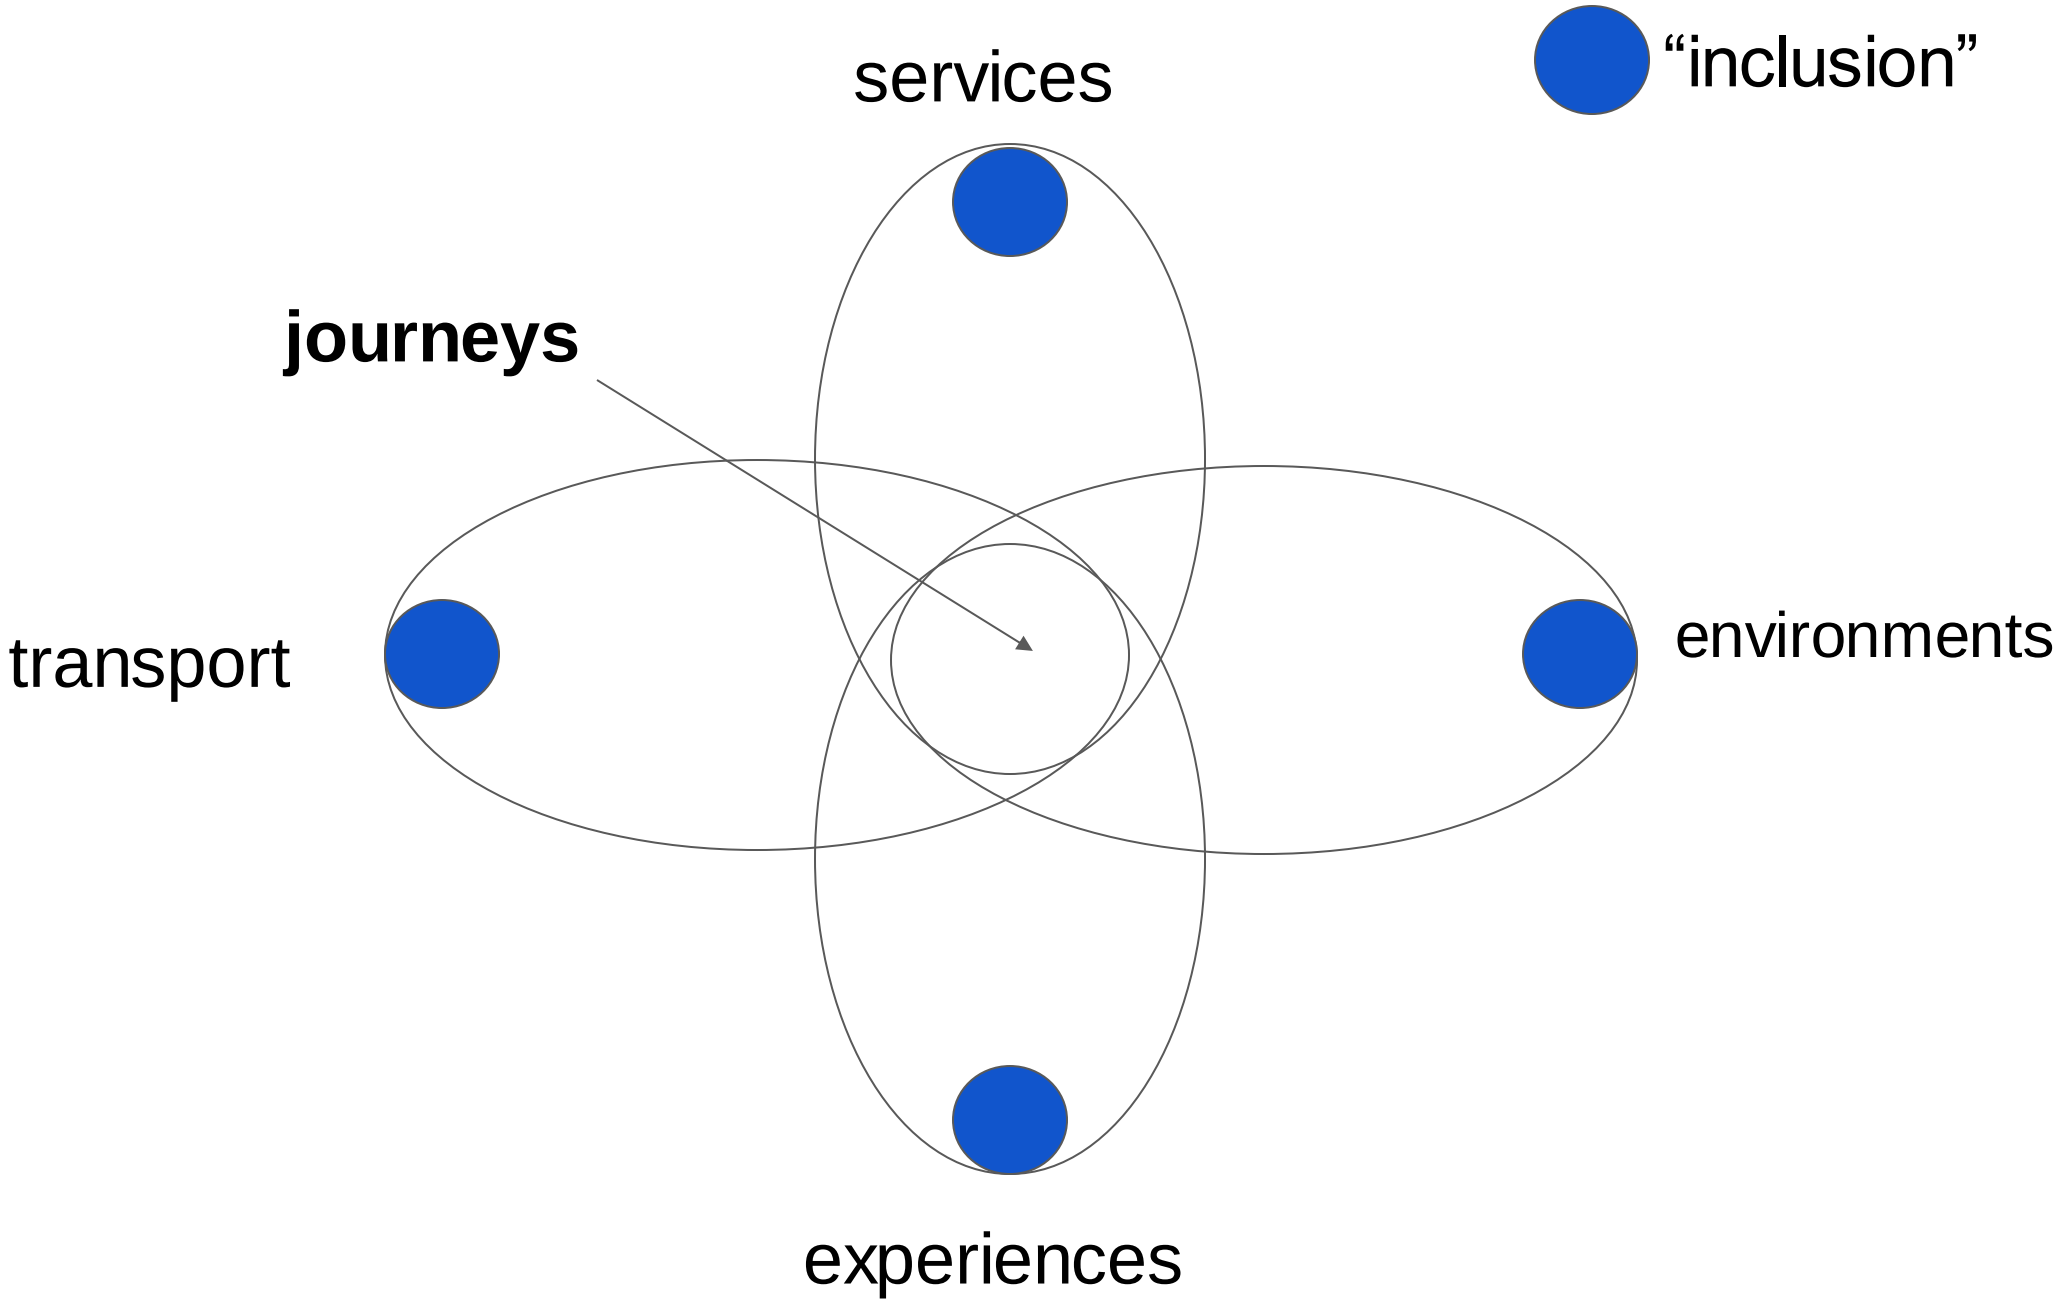

- that disabled people stand to be impacted significantly by climate change;
- that many of the climate actions being promoted to address climate change may make life more difficult for disabled people.

Recommendations for UK Government

Better define the most **desirable, equitable vision** of the future of transport

Engage the public in a national conversation about the need to reduce emissions from transport

Enable more collaboration across sectors…

Inclusive low carbon journeys

Go Upstream

Learn about the climate emergency

Hear about plans, designs and ideas for a low carbon future

View those plans with our experiences of exclusion

Imagine more inclusive versions

Tell stories of what will make travel possible or easier or more attractive

Create visions for entire low carbon journeys that are **desirable and equitable**
